Comments and errors

Errors:

1. The test "login with wrong email format credentials read data from fixture" in the file with path: "Cypress\e2e\tests\login.test.ts" finish with an error.

```
    1) login with wrong email format credentials read data from fixture

  4 passing (2m)
  1 failing

  1) Login Functionality
       login with wrong email format credentials read data from fixture:

     Timed out retrying after 5000ms
     + expected - actual

     -'Invalid email address.'
     +'Invalid email addressssss.'
```
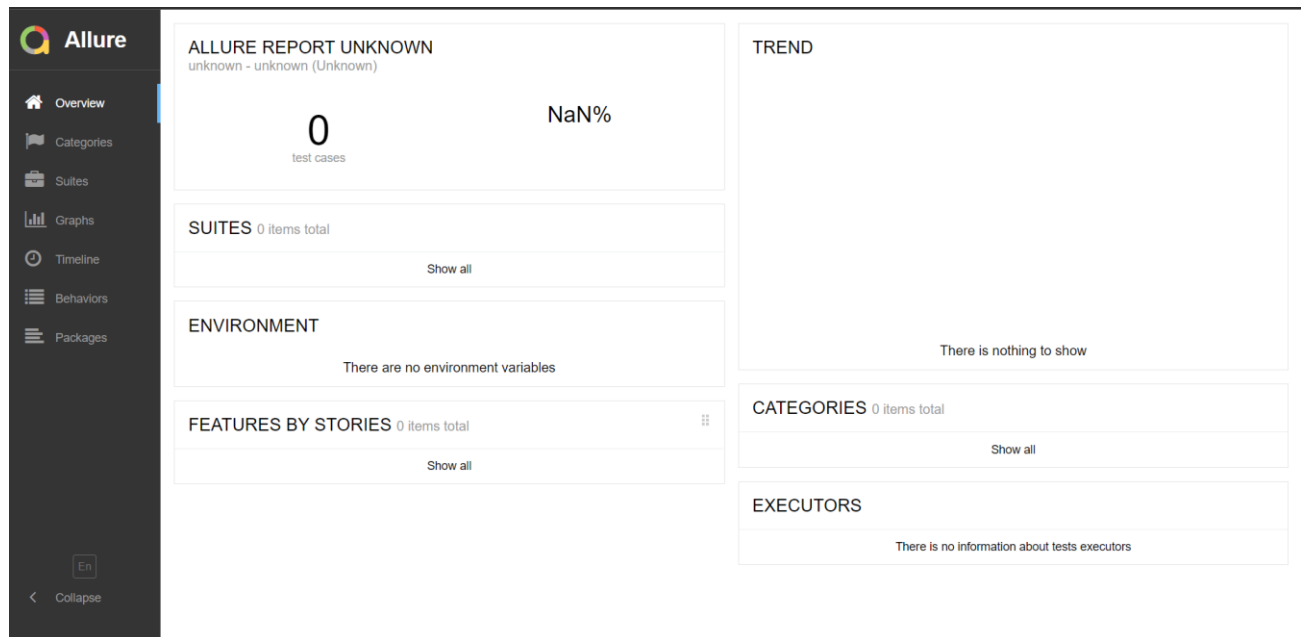

2. In the file in the path "Cypress\fixtures\users.json", in the "valid_credentials" block in "wrong_email_format" the data for testing is not correct in not only email but also the password.

```
1   {
2       "valid_credentials": {
3           "emailId": "testautomation@cypresstest.com",
4           "password": "Test@1234"
5       },
6       "invalid_credentials": {
7           "invalid_email": {
8               "emailId": "invalidUser@cypresstest.com",
9               "password": "Test@1234"
10          },
11          "invalid_password": {
12              "emailId": "testautomation@cypresstest.com",
13              "password": "test@12345"
14          },
15          "wrong_email_format": {
16              "emailId": "testautomationresstest.com"
17              "password": "test@12345"
18          }
19      }
20  }
```

should be ✓

3. In file "package.json" script "report" does not work as should be. Script just generate empty allure report folder and opens empty html report

Comments:

How to fix errors:

1. Change 'Invalid email addresssssss' to 'Invalid email address'

```
33      it('login with wrong email format credentials read data from fixture', function () {
34          loginPage.login(this.data.invalid_credentials.wrong_email_format.emailId, this.data.invalid_credentials.wrong_
35          loginPage.validateLoginError('Invalid email addresssssss.')
36      })
37  })
```

```
it('login with wrong email format credentials read data from fixture', function () {
    loginPage.login(this.data.invalid_credentials.wrong_email_format.emailId, this.data.invalid_credentials.wrong_email_format.password)
    loginPage.validateLoginError('Invalid email address.')
})
})
```

2. Change in "wrong_email_format" password: "test@12345" to "test@1234"

```
"wrong_email_format": {
    "emailId": "testautomationresstest.com",
    "password": "test@12345"
}
```

```
"wrong_email_format": {
    "emailId": "testautomationresstest.com",
    "password": "test@1234"
}
```

3. Chane script "report"

```
"report": "npx allure generate reports/ui/allure-results --clean -o reports/ui/allure-report && allure open reports/ui/allure-report"
```

```
"report": "npx allure generate allure-results --clean -o allure-report && allure open allure-report",
```

4. Test in file on path: "cypress\e2e\tests\myAccount.tests.ts" doesn't have any tests

5. Asserts should be in test files not in page objects files

6. Some page objects which are related in "login page" are in "Cypress\e2e\tests\myAccountPage.ts". "Login page" and "my account page" page objects need to be separated. My account page objects should be in "myAccount.test.ts".

7. "Page" folder with page objects files should be on the same level with "e2e" folder

8. In README, on "Steps to run" section step 2: change "Username" and "Password" it is not quite clear where and which "Username" and "Password" need to be changed.

9. Commits title are not always clear as should be
